

Ivan 2.0 is a high quality flat bar internal sliding door system available in either satin black or 304 stainless finishes. This kit is supplied as standard with both Softopen and Softclose pre mounted onto the track. These will work with a door up to 80kg. **Should the door be between 80kg-150kg then remove the softclose units.** We now have a 3000mm kit as well as the original 2000mm kit to allow for doors upto 1500mm wide. Wall brackets are also available to allow double track, bi-passing applications. Tracks can also be joined together to create bi-parting layouts.
