

Technical Details

Colonial Heritage Lock

The Colonial Door Lock was brought to the market to give more consideration to the aesthetic design of the door, which removes the requirement for a lift lever handle and replacing it with a key wind lock via a cylinder at 15mm. This in turn gives more of a traditional appearance with increased security.

- Elegant appearance
- 45mm backset, 16mm faceplate (35mm available)
- Manual slide snib for latch retention
- 2 high security pins
- Soft latch
