

The ED20 Series of Commercial Mechanical Digital Locks

The ED20 Series of locks is a range of entry level digital door locks.

Ideal for store doors, residential projects, retail, sheds and garages. The range includes;

- Non Hold Back
- Hold Back
- Key Override

The product is made to a high standard with a zinc alloy body.

The ED20 series range is quick and easy to fit. It is non handed and suitable for doors 35mm to 55mm thick.

The Quick Code change allows users to easily amend security codes.

The coordinated rubber backing plate offers weather protection for external use.
