

APPROVED DOCUMENT M

ACCESS TO AND USE OF BUILDINGS

Approved Document M provides information about the ease of access to, and use of, buildings, including facilities for disabled visitors or occupants, and the ability to move through a building easily, including access to toilets and bathrooms.

The part of the regulation that we'd like to draw attention to is wheelchair access to a building. i.e. through a door way, for this we refer to Appendix A Key Terms Accessible Threshold it states;

A threshold that is level or, if raised, has a total height of no more than 15mm, a minimum number of up stands and slopes and with any up stands higher than 5mm to be chamfered. So, from this regulation the industry designed Part M Compliant Thresholds for open in and open out doors. Please see on the opposite page thresholds we offer that provide a solution for this regulation.
